

Release Notes DMS 1.12.0

Features

- Resizable Preview Panel
 - Drag-to-resize document preview panel
 - Configurable via settings with legacy mode fallback
 - Document table adapts column count when preview is hidden
- Preview toggle button, min/max width constraints
- Document Check-Out / Check-In
 - Manual check-out and check-in from context menu
 - Check-out status synced with Nuxeo lock/unlock
 - Check-out greyed out for final documents, hidden for non-Draft
 - Download before lock with user confirmation
- Document Table: Configurable maximum visible lines per cell

Infrastructure

- Build script validation improvements
- Configurable health check timeout
- Improved Docker restart behavior

Bug Fixes

- Archive and binary files excluded from preview generation
- Fixed deadlock in Word-to-PNG conversion
- Hidden categories now respect user security permissions (DMSDESK-1014)
- Fixed nested email version reset on folder move
- PostgreSQL autovacuum tuning
- Improved SQL Server deadlock detection
- Improved OCR process handling

Other

- Email service refactored to support special characters in message IDs
